

**Broysan** allows you to make an additional bathroom, kitchen, laundry room even far from soil stack without needing any major construction.

**Broysan** is a box containing a powerful and silent macerator which allows to discharge waste through a small diameter pipe to the nearest soil stack.

**Broysan** can be connected to a toilet with horizontal trap. Through the additional side connections it's also possible to connect any other bathroom's device and the waste water from any other device.

**Broysan** is a trademark of **Planus SpA**, a company boasting a over 30 years experience in design and production of automatic discharge devices, macerators and toilets provided with an integrated pumping system.

## BROYSAN

### How it works:

<p><b>1:</b> The rise of the the water level in the box generates pressure against the pneumatic sensor (a) which automatically turns on the pump.</p>	<p><b>2:</b> Solid waste (b) coming from the toilet are at the beginning held in the basket (c).</p>	<p><b>3:</b> Grinding blades (d) reduce solid waste into small fragments which can leak through the holes of the basket and collect on the bottom of the box.</p>	<p><b>4:</b> Small fragments and water are sucked out by the pump and ejected through the discharge pipe.</p>

### Technical specifications:

measures expressed in millimeters

Power	450W
Maximum discharge distance	100m
Maximum discharge height	8m
Discharge pipe diameter	23/28/32mm

Comply with following standards:

EN 12050-3

**MADE IN ITALY**
